WWW.RMSENERGY.COM

RMS Energy is a nationwide engineering, service and construction firm that aids utility, industrial, and institutional facilities in achieving peak efficiency through comprehensive inspections, repair, refurbishment, custom turnkey projects and maintenance programs.

When it comes to the reliability and operation of your electrical system, RMS Energy strives to be your single resource partner.

ISOLATED PHASE, CABLE & NON-SEGREGATED BUS SYSTEMS

NEW INSTALLATIONS

- Turnkey Supply and Installations
- Forced Cooled Systems
- OEM Independent
- Custom Engineered Bus Designs
- Structural Steel Design and Supply

MODIFICATIONS

- Bus Retrofit Solutions
 - Design and Supply
 - Accommodate New Electrical Equipment
 - OEM Independent
- Upgrades
 - Forced Cooled Systems
 - Terminations
 - Heater Systems
 - Pressurized Air Systems

INSPECTION, MAINTENANCE AND REPAIRS

- Routine Maintenance Programs
 - IR Scanning
 - Hi-Pot Testing
- Cryogenic Cleaning
- Critical Bus Repairs
- Reconditioning of aging bus systems
- Onsite Silver Plating

PARTS SUPPLY

- Difficult to find, vintage OEM parts
- Insulators
- Bus Bar Adapters
- Laminated and Braided Flex Connectors
- Aluminum and Rubber Bellows
- Gasketing and General Hardware Material

ENGINEERING

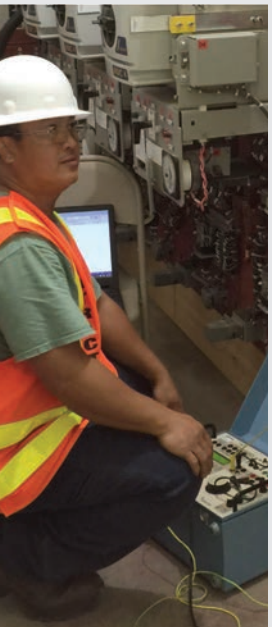

- Force Cooled Capacity Studies
- High Voltage Withstand Studies
- New System Design
- Retrofit Design

ELECTRICAL APPARATUS

NEW INSTALLATIONS

- Turnkey Supply and Installations
 - Transformers (Network, Power & Distribution)
 - Circuit Breakers (SF6, GCBs, all types)
 - MV and LV Switchgear
 - Protection & Control
 - Motor Control Centers
 - VFDs
 - Automatic Transfer Switches
- OEM Independent

INSPECTION, MAINTENANCE AND REPAIRS

- Electrical Testing
 - Transformers – Doble pf, TTR, Winding Resistance, etc.
 - Circuit Breakers – Timing, Megger, Contact Resistance, etc.
 - Switches – Ductor, Megger
 - Relays
 - Cables – Hi-Pot, Megger, Tan Delta
 - Oil Analysis
 - Automatic Transfer Switches
- IR Scanning of All Apparatus
- Cleaning
- Transformer Oil Processing
- Instrumentation Calibration
- Power Quality Metering

MODIFICATIONS

- Retrofit Solutions
 - Design and Supply
 - Circuit Breaker Rebuilds/Recondition (MV/LV)
 - OEM Independent
- Substation Construction – Turnkey Services
 - Transformer Install and Dress Out
 - Breaker Installation
 - Rigging Services
 - Steel Erection
 - Cable Install and Termination
 - Below Grade

- Engineering
 - Protection and Control
 - New System Design
 - Substation Design
 - Retrofit Design
 - Arc Flash and Coordination
 - Certified Energy Management
 - SCADA Design

SAFETY FIRST WITH AN EMR OF 0.65

RMS Energy teams are experienced professionals who are trained on every job they undertake. Part of that training is ensuring that safety is a Number One priority. With an industry-low EMR, safety is embedded in the RMS Energy culture.

24/7 EMERGENCY SERVICES

EMERGENCIES - CALL: 888-683-3630

Sometimes an emergency is defined not by what caused it, but by how it's handled. Count on RMS Energy to help you respond quickly and efficiently to an unforeseen problem or equipment failure at your facility.

MOBILIZED WITHIN 24 HOURS

With Emergency Services from RMS Energy, we'll mobilize to your site within 24 hours of your first phone call. Whether your emergency is a transformer problem, a bus failure, damage from fire, a generator re-wind, or something else unexpected, RMS Energy will analyze the problem fast, put a plan together, and get right to work.

FAST-TRACK SHIPMENTS

At RMS Energy, we have solid working relationships with all the top bus system Original Equipment Manufacturers (OEM). We are able to fast-track shipments of new parts so your downtime is limited.

When it comes to emergency response, rely on RMS Energy to be your go-to team to get you back up and running right away.
