

## Specialty Welding and Mechanical Services

RMS Energy's specialty welding and mechanical services is a leader in the industry, addressing the needs of our customers beyond normal standards. At RMS Energy, our specialty work includes piping fabrication and installation utilizing top-of-the-line certified welders. RMS can handle most any welding job with alloys that include carbon steel, aluminum, chrome, and many other alloys.

The goal of RMS Energy is to provide a level of safe, quality, and productive specialty work that surpasses other providers by delivering the best in fabrication and installation to customers. We accomplish this through competitive pricing, top level craftsmanship, and our years of experience in the industrial sector.

- Stainless Steel
- Titanium
- And others

## WHAT OUR CLIENTS ARE SAYING

"The *dedication, attention to detail* and *quality standards* that the crew displayed was very gratifying."

**Peter Margliotti**, Combustion Turbine Specialist,  
GDF Suez Armstrong Energy

"I was appreciative of *all of the effort that you and the rest of the RMS Energy team* did in supporting and supplying us the answers and material needed for this project (on an emergency basis)."

**Steven Glover**, Entergy Fitzpatrick Nuclear
